FLUID SMART

INTRODUCING FLUID SMART

The Fluid Smart System

Fluid Smart is a customizable visual lubrication system for industrial equipment emphasizing color and symbol coding, immediate identification of crucial maintenance information, standardization, waste reduction and contamination control from the point of bulk storage to the fill point.

The Fluid Smart system eliminates the opportunity for problems to occur through a specific and customized chain-of-custody maintenance personnel can easily follow. This ensures the right product get to the right place in the right amount at the right time without any guess work.

10 Colors to choose from - 9 shapes to choose ...gives you 90 different options on each product.

Dry Erasable Wall Chart for Identifying Colors to Specific Fluids.

Dry Erasable Wall Chart for Identifying Colors to Specific Fluids.

- **Drum Labels**
- **Dispenser Tags**
- **Container Stickers**
- **Blank Stock** (for handwritten use)
- **Customized** (with colors and symbols)
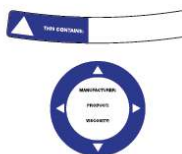

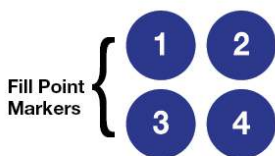

Chain-of-custody = fool-proof coding.

Benefits to your customers:

- Eliminates likelihood of cross contamination of fluids
- Ensures proper maintenance practices extending equipment life.
- Customizable to your customers asset management system
- Helps to streamline maintenance work-flow
- Easy to integrate into LEAN manufacturing and 5S programs
- Improves productivity
- Increases bottom line profits

Benefits to you:

- Innovative program that adds value to your customer offer
- Branded with your company logo
- Allows sales team to be a partner in customer lubricant supply chain
- Can provide Immediate MSDS Information on products
- Increases bottom line profits
